

Frontend Task

Instructions

- Design a responsive webpage incorporating a form, based on the reference design provided.
- The form should consist of the following fields: Name, Email, Phone Number, How Can We Help? (Description), Services, and a Send Message button.
- Ensure the webpage is fully responsive, adapting seamlessly to various screen sizes and devices.
- Implement error validation to enhance user experience.
- Upon form submission, utilize the provided API to transmit the captured data to the server.
- You are encouraged to incorporate interactive elements and demonstrate your proficiency in frontend frameworks (e.g., React, Angular, or Vue.js) if you have experience with them.

API Details

URI	:	http://formz.in/api/task
